

**COMPRESSUS BOLSTERS EXECUTIVE TEAM TO EXPAND INTEROPERABILITY
MARKET PIONEERED BY MEDxCONNECT™**

**Janine Broda Elevated to Chief Marketing Officer and PACS Industry Veteran
Shawn Gibbons Joins as Executive VP and MEDxConnect™ General Manager**

WASHINGTON, DC., Feb. 3, 2009 – Compressus, Inc., leaders in healthcare IT systems interoperability solutions, bolstered its senior executive team with the promotion of Janine Broda to chief marketing officer and the recent appointment of Shawn Gibbons as corporate executive vice president and general manager of the MEDxConnect™ division.

Proven to increase physician efficiency, reduce Enterprise costs and improve patient safety, Compressus' MEDxConnect is the first and only software solution that indexes, integrates and routes all relevant patient medical information in real time. Focused exclusively on providing interoperability solutions, MEDxConnect was built from the ground up to address the need for connectivity across disparate HIS, RIS, PACS and related information systems that enables organizations with disparate multi-vendor systems to function as one virtual enterprise.

“Janine joined Compressus three years ago as the Company was transitioning into the interoperability market and has led Compressus' efforts to define and build a whole new marketplace in healthcare IT. Her passion and vision for this market are unparalleled,” said John B. Macfarlane, CEO, Compressus. “With both a clinical radiology background and deep PACS product management and marketing experience, Shawn Gibbons brings tremendous industry and operational knowledge to Compressus. We expect their combined industry expertise and experience will greatly bolster our ability to drive understanding and adoption of the company's Enterprise Systems Integration solutions.”

Previously serving as vice president and general manager of the MEDxConnect division, Broda is now responsible for market positioning for Compressus' medical imaging products. With more than 25 years of healthcare industry experience with expertise in sales, marketing and customer service, she has managed major software and hardware acquisitions for large HMOs and GPOs, the military and government agencies. Prior to joining Compressus, Broda was the vice president of professional services and director of sales for the Western region of Fischer Imaging Corporation. Prior to that, Broda spent 18 years at Agfa Healthcare, starting as a sales executive and eventually becoming director of strategic business development. Broda has also been an independent mammography consultant and a technical product manager at DuPont. She holds an M.B.A. from the University of Delaware, a Bachelor of Science from Ohio State

University, a Bachelor of Arts from Otterbein College and a degree in respiratory therapy from Riverside Methodist Hospital.

Gibbons' will be responsible for managing the continued expansion of the MEDxConnect sales, marketing, and customer support operations. A 25-year veteran of the PACS, healthcare information systems and radiology industries, Gibbons previously served as global PACS product manager for GE Healthcare IITS. Responsible for all PACS programs, including radiology, cardiology and Enterprise system, Gibbons joined GE when IDX Corporation was acquired. At IDX, he served as the Imaging-Integration product manager responsible for the new product launches, development of a cardiology PACS product line and the overall product roadmap. Gibbons also spent more than five years with AGFA Medical, where he held positions of increasing responsibility in product and marketing management. A certified radiology technologist and graduate of Cardinal Stritch University in Milwaukee, WI, Gibbons began his career with clinical applications positions with Philips Medical Systems.

“Shawn's experience at GE and AGFA, two leading PACS industry providers, not only bolsters our industry knowledge and relationships but, as importantly, brings his experience working with thousands of customers to implement PACS and healthcare IT systems solutions. This experience is critical as we make the promise of true interoperability in healthcare a reality through the adoption of Compressus' world class MEDxConnect solutions,” said Macfarlane.

About Compressus Inc.

Established in 2000, Compressus, Inc. is a medical software company offering proven solutions for problems of interoperability and interconnectivity in the rapidly growing healthcare IT market. Its MEDxConnect software is the first solution that indexes, integrates and routes all relevant patient medical information to the healthcare professional in real time, thus dramatically improving physician efficiency, reducing enterprise costs and increasing patient safety. The MEDxConnect products address the problems associated with integrating healthcare enterprises plagued by the lack of connectivity and interoperability between disparate vendors of HIS, RIS and PACS systems. Designed to manage the workflow of an imaging healthcare enterprise, the MEDxConnect System is a suite of offerings that has the power to connect disparate HIS/RIS/PACS systems and provide automated interoperability to the enterprise and allows an organization with disparate multi-vendor system function as one virtual enterprise.
